

Helping Low-Income Families and Local Communities in Tennessee

The Supplemental Nutrition Assistance Program (SNAP) offers nutrition benefits to participating clients, supports work, and provides economic benefits to communities. The SNAP brings Federal dollars into communities in the form of benefits which are redeemed by SNAP participants at local food stores. Increasing SNAP participation provides an immediate stimulus to local economies.

Increase in SNAP Participation Creates Substantial Economic Results

Every \$5 in new SNAP benefits generates 9.00 in total community spending.

The FY 2010 average monthly SNAP benefit was about \$289 per household, which is spent in local food stores.

Tennessee FY 2008 SNAP Participation Data

Total Eligible Participants	1,018,000	Actual Participants	889,000
Eligible Non-Participants	129,000	Participation Rate	87%
Total Benefits Disbursed	\$ 1,114,791,000	Total Economic Activity	\$ 1,114,791,000
Additional Benefits with Full Participation	\$ 62,660,000	Additional Economic Activity with Full Participation	\$ 112,840,000

Because the majority of SNAP benefits are redeemed the month they are issued, SNAP acts as an immediate economic stimulus to struggling local economies. New SNAP benefits also generate additional economic activity as families are able to increase their overall food purchasing power.
